

HOW PLANT SCIENCES CAN BE LEVERAGED TO MEET TODAY'S GRAND CHALLENGES.

JOIN US FOR A VIRTUAL COMMUNITY CONVERSATION!

Quest University Canada invites you to join us for a community conversation focused on how plant sciences can be leveraged to meet today's Grand Challenges. We will have a panel of local and regional experts who will tell us how their work is contributing innovative solutions to challenges facing today's society, from urban agriculture and grassroots movements to cutting edge biotechnology solutions for sustainable and resilient industrial agriculture. Joining us will be Squamish Food Policy Council members Constance Wylie and Krystle tenBrink, Terramerra's Dr. Steve Slater, and DynamicWholeScapes' Thomas Schneider. Speaker talks will be followed by a moderated discussion featuring questions from the audience.
